

Magna Joint Mortar is a semi-mix high quality mortar used for joining and bonding of AAC Blocks. The presence of highly formulated polymers in the mortar stops water getting vaporized and provides good bonding strength between the blocks which suits for framed structure constructions.

### ADVANTAGES

Ready to use

Higher strength with thin joints

No wastage

High coverage

Cost effective

### TECHNICAL SPECIFICATIONS

PARAMETERS	SPECIFICATIONS
Coverage	65-70 sq.ft (Considering joint thickness of 2-3 mm)
Compressive Strength in 7 Days	> 5 N/mm sq
Curing	Not required
Pot life	Approx 30 minutes
Water required	25 - 30%
Appearance	Free flowing and grey in colour

\* 25kg Available
