

Magna Wall Putty is a polymer modified white cement based wall putty specially developed as a finishing coat to cover the unevenness and pinholes created by plastering and to prepare the wall/ surface for painting. It can also be treated as a base coat for painting. Magna Wall Putty is specially formulated using German make polymers to impart classy finish to walls and ease of work to applicators.

ADVANTAGES

Saves time and increases labour productivity

Excellent bonding and low wastage

Economical

TECHNICAL SPECIFICATIONS

PARAMETERS	SPECIFICATIONS
Bulk Density	1.2 - 1.6 Kg/litre unit
Compressive Strength	7 - 9 Mpa
Flexural Strength	Min 1.8 Mpa in 28 days
Water Retentivity	Min 95% (EN 1015-8)
Colour	White
